

## **You have now applied for a new residence card on the basis of temporary protection – this is how you will receive it**

You will receive a new card within about 2 weeks of your application. When your residence permit card is ready, we will send it to you by post to the address you provided in your application. Please note that your residential address must be in Finland for us to send you the card.

We send each card as a separate shipment. If you have applied for a new residence permit card for yourself and your child, we will send both cards separately.

## **When you have received a new residence card, destroy your old temporary protection residence card**

When you have received a new residence card, destroy your old temporary protection residence card.

- Cut the card chip into four pieces – first, two pieces vertically and then two pieces horizontally.
- Then put the parts in mixed waste. You can divide the parts into several bin liners.

The residence permit card must be destroyed so that no one can misuse it.
